## Skills

**Laravel/PHP**
RESTFul API

**Flutter/Dart**
Mobile Application

**Django/Python**
Website/ RESTful API

**Databases**
MySQL and MongoDB

**Firebase**
Cloud storage/Cloud messaging

## Languages

**Engligh** (CEFR-level B1)

## Professional Experience

### Fullstack Developer
2022 – 2023
Developed a mobile application using Flutter for the frontend and Laravel for the backend. The app was designed for an event with over 2000 startups and enables users to browse through a list of startups and vote for their favorite ones. Additionally, users can bookmark their favorite startups, view a list of startups they have voted for, and search for startups by categories.

### Co-founder / Fullstack Developer, *website* ⬈
2021 – 2022
Co-founded and developed a mobile application for tracking vehicle services, using Flutter for the frontend and Laravel for the backend. The app has gained over 4,000 users, providing them with a convenient and efficient way to track their vehicle services.

### Software Developer (Freelance)
2019 – 2020
As a web developer, I have designed and developed multiple websites and APIs using Django REST API. Most of these projects were ecommerce websites, featuring responsive designs and intuitive user interfaces that allow users to easily browse and purchase products. Additionally, I have implemented various features such as user authentication, database integration, and payment gateway integration to enhance the functionality of the sites and APIs.

## Education

**Computer Software Engineering,**
*Islamic Azad University of Yadegar Emam*
2022 – present

**Software Engineering,**
*Islamic Azad University South Tehran Branch*
2020 – 2022
